Alexander & Associates is a state of the art technical design firm dedicated to serving today's fast paced, ever-changing engineering community. We have an established record of design expertise, schedule control, and cost containment with a commitment to total quality control on a global basis. Since 1943, Alexander & Associates has consistently achieved excellent results across a broad segment of industry. Our primary areas of engineering and design expertise are mechanical, power & controls, project management, and information systems. It is our goal to achieve a long term working relationship with our clients. In this way, our staff can become thoroughly familiar with our client's technical needs and procedures and, therefore, serve as a readily available resource on an on-going basis. We are actively seeking a talented, enthusiastic **Mechanical Designer / Design Engineer** to join our staff of technically trained personnel who enjoy a fast paced, problem solving environment. Enjoy full benefits and the opportunity to experience career and personal growth. Excellent opportunity.
